In the address bar above this site, click the green lock icon, and then click Flash in the drop-down menu. Then always click allow. Then you will be able to play all our games without any problems. Join Our Discord! Click here! The goal is to get a single tile to be 2048. Get two of the same numbers side by side and add them together using your arrow keys. Use the arrow keys to move your tiles in one direction or another. Take a break in new and new for food and water.2048 TIPSPick a corner - The goal is to make a tile 2048. The easiest way to do this is to select a corner and focus on making that corner field your highest number of field. Most people choose the bottom right corner, but you can choose everything corner feels good to you. Once you've selected a corner, two directions will always keep your number in that corner, and the other two are risky to press without thinking. Don't let your biggest number leave that corner unless you have no other choice! Build a number chain - After you select a corner, select a row (or column) to link numbers in. All your Numbers should be in this row, from smallest to largest, to make it easier to merge tiles together. Sample Sample Always keep this row full of numbers (even small) so you can move safely in three directions. When you get above 512, you may need to link into the row next to the one you're already using. Keep track of things! - Try to keep your larger number neat and organized. Do not combine them all over the board without thinking. Doing so ends up with a lot of large fields that can't be merged. Focus on keeping your large numbers in the chain described above. You can keep the game going by keeping the number of larger numbers to a minimum and keeping the board full of smaller numbers instead. Plan ahead - Your game will last longer if you take a few steps forward to plan your moves. Try to make sure that a row or column with the largest number is always full or close to full of numbers. When new numbers appear, they are usually a 2 or 4. Think about where you need to combine numbers to keep your chain in order. All of the above strategies will only work if you take a minute to look ahead before you start merging your tiles. WHAT YOU LEARN BY PLAYING 2048!If you play 2048, you will become very familiar with powers 2 and you will need to plan and think strategically.2048 CopyrightCopyright (c) 2014 Gabriele Cirulli.
